

Product: Built-in range with Radiant hobs

Manufacturer: Berner Kochsysteme GmbH & Co. KG

Typ: BS3CEGQ

Design and performance:

High-performance built-in induction appliance with three cooking zones side by side

For installation with support frame or with flush-mounted ceramic hob. May only be installed in fireproof materials such as stainless steel or granite. The use of wood and pressed materials nearby presents a risk from a fire protection point of view.

The appliance is easy to operate using a fully adjustable power control dial, residual heat indicator beneath the glass and a main switch with ON lamp.

All of Berner's built-in appliances with radiant heating elements are equipped with overheat shut-off. This prevents the ceramic glass or dishes placed on it from being damaged by excessive heat.

**Version A
Auflagerahmen**

**Version B
flächenbündig**

Scope of delivery:

Cable
Control dial
Dial
1 Ceran scraper

Optionen:

BBS can be operated from both sides (upon request)
EOH Configured for energy optimisation
AKS, AKG, AKE Silver, gold or stainless steel dial
ESB Stainless steel control panel
PCS Ceran scraper
CPPS Collo Profi care kit

Technical specifications:

Outer dimensions: 1000x400 mm (BxT) **Var. A**

Ceran glas: 950x350x6 mm (BxTxStärke) **Var. B**

Radiant elements in mm: 3 x round, 230

Voltage in Volt: 400 V

Power in kW: 3 x 2.5 = 7.5 kW

Drawings and operating instructions: <http://www.induktion.de/download.html>

Dimensions are approximate. Subject to technical changes and color deviations due to printing technology
